Adjustment Computations. Spatial Data Analysis. 5th Edition

Description: the complete guide to adjusting for measurement error expanded and updated

no measurement is ever exact. Adjustment Computations updates a classic, definitive text on surveying with the latest methodologies and tools for analyzing and adjusting errors with a focus on least squares adjustments, the most rigorous methodology available and the one on which accuracy standards for surveys are based.

This extensively updated Fifth Edition shares new information on advances in modern software and GNSS–acquired data. Expanded sections offer a greater amount of computable problems and their worked solutions, while new screenshots guide readers through the exercises. Continuing its legacy as a reliable primer, Adjustment Computations covers the basic terms and fundamentals of errors and methods of analyzing them and progresses to specific adjustment computations and spatial information analysis. Current and comprehensive, the book features:

- Easy–to–understand language and an emphasis on real–world applications
- Analyzing data in three dimensions, confidence intervals, statistical testing, and more
- An updated support web page containing a 150–page solutions manual, software (STATS, ADJUST, and MATRIX for Windows computers), MathCAD worksheets, and more at [external URL]

- The latest information on advanced topics such as the tau criterion used in post–adjustment statistical blunder detection

Adjustment Computations, Fifth Edition is an invaluable reference and self–study resource for working surveyors, photogrammetrists, and professionals who use GNSS and GIS for data collection and analysis, including oceanographers, urban planners, foresters, geographers, and transportation planners. It’s also an indispensable resource for students preparing for licensing exams and the ideal textbook for courses in surveying, civil engineering, forestry, cartography, and geology.

Contents:

PREFACE xv

ACKNOWLEDGMENTS xix

1 Introduction 1

1.1. Introduction 1

1.2. Direct and Indirect Measurements 2

1.3. Measurement Error Sources 2

1.4. Definitions 3

1.5. Precision versus Accuracy 4

1.6. Redundant Observations in Surveying and Their Adjustment 6

1.7. Advantages of Least Squares Adjustment 8

1.8. Overview of the Book 9

Problems 10

2 Observations and Their Analysis 12
23.3. Minimum Number of Constraints 490
23.4. Example Adjustment 490
23.5. Building an Adjustment 499
23.6. Comments on Systematic Errors 499
23.7. Software 502
Problems 503
Programming Problems 507
24 Combining GPS and Terrestrial Observations 508
24.1. Introduction 508
24.2. Helmert’s Transformation 510
24.3. Rotations between Coordinate Systems 513
24.4. Combining GPS Baseline Vectors with Traditional Observations 514
24.5. Another Approach to Transforming Coordinates between Reference Frames 518
24.6. Other Considerations 521
Problems 522
Programming Problems 524
25 Analysis of Adjustments 525
25.1. Introduction 525
25.2. Basic Concepts, Residuals, and the Normal Distribution 525
25.3. Goodness–of–Fit Test 528
25.4. Comparison of Residual Plots 531
25.5. Use of Statistical Blunder Detection 533
Problems 534
26 Computer Optimization 536
26.1. Introduction 536
26.2. Storage Optimization 536
26.3. Direct Formation of the Normal Equations 539
26.4. Cholesky Decomposition 540
26.5. Forward and Back Solutions 542
26.6. Using the Cholesky Factor to Find the Inverse of the Normal Matrix 543
26.7. Spareness and Optimization of the Normal Matrix 545
Problems 584
Programming Problems 585
Appendix D Normal Error Distribution Curve and Other Statistical Tables 586
D.1. Development of the Normal Distribution Curve Equation 586
D.2. Other Statistical Tables 594
Appendix E Confidence Intervals for the Mean 606
Appendix F Map Projection Coordinate Systems 612
F.1. Introduction 612
F.2. Mathematics of the Lambert Conformal Conic Map Projection 613
F.3. Mathematics from the Transverse Mercator 616
F.4. Stereographic Map Projection 619
F.5. Reduction of Observations 621
Appendix G Companion Web Site 625
G.1. Introduction 625
G.2. File Formats and Memory Matters 626
G.3. Software 626
G.4. Using the Software as an Instructional Aid 630
Appendix H Solutions to Selected Problems 631
BIBLIOGRAPHY 636
INDEX 639

Ordering:
Order Online - http://www.researchandmarkets.com/reports/2241663/
Order by Fax - using the form below
Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Adjustment Computations. Spatial Data Analysis. 5th Edition
Web Address: http://www.researchandmarkets.com/reports/2241663/
Office Code: SC

Product Format
Please select the product format and quantity you require:

| Quantity | Hard Copy (Hard Back) | USD 202 + USD 31 Shipping/Handling |

* Shipping/Handling is only charged once per order.
* The price quoted above is only valid for 30 days. Please submit your order within that time frame to avail of this price as all prices are subject to change.

Contact Information
Please enter all the information below in BLOCK CAPITALS

Title: Mr ☐ Mrs ☐ Dr ☐ Miss ☐ Ms ☐ Prof ☐
First Name: __________________________ Last Name: _______________________
Email Address: * _______________________
Job Title: ______________________________
Organisation: __________________________
Address: ______________________________
City: ________________________________
Postal / Zip Code: ______________________
Country: ______________________________
Phone Number: _________________________
Fax Number: ___________________________

* Please refrain from using free email accounts when ordering (e.g. Yahoo, Hotmail, AOL)
Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by Wire Transfer: Bank details will be provided on the invoice which you will receive after you place your order with us.

If you have a Marketing Code please enter it below:
