Global Hadoop-as-a-Service(HDaas) Market 2015-2019

Description:
Hadoop is a provisioning model offered to organizations seeking to incorporate a hosted implementation of the Hadoop platform. Apache Hadoop is an open-source software platform that uses the MapReduce technology to perform distributed computations on various hardware servers. Hadoop-as-a-service (HDaaS) providers offer Hadoop PaaS, which enables technical experts of enterprises to perform various operations including big data analytics, big data management, and big data storage in a cloud. Vendors provide the HDaaS platform as a web-based subscription service on a pay-per-use basis. The platform eliminates the need for any on-premise hardware; it abstracts the Hadoop architecture and supporting applications into a single cloud-based offering. The HDaaS platform enables enterprises to use the Hadoop technology in a cost-effective manner, while ensuring minimal time consumption.

The analysts forecast the Global HDaaS market to grow at a CAGR of 84.81 percent over the period 2014-2019.
