Single Source has been designed and engineered to represent the ideal single source model. It provides an integrated understanding of consumers; what they are like, what they consume, what they buy, what they think, what they want, what they watch, read and listen to. It incorporates over 50,000 face-to-face interviews in both city and country areas, each year with people aged 14+. Weekly interviewing is conducted continuously allowing for trending of data. Around 20,000 self-completion surveys provide enriched detail of consumption habits and attitudes. Of these around 16,000 are categorised as Main Grocery Buyers.

The overriding benefit of Single Source is the strategic insights it affords by the linkage of so many aspects. Not only can an organisation's (and its competitors') profitable customers be delineated by what they think, do and watch, but so can non-customers. Hence brand positioning, product differentiation, merchandising, efficient media planning, market expansion and line extension opportunities can be understood in the context of the current marketplace.
