Electroporation-Based Therapies for Cancer. Woodhead Publishing Series in Biomedicine

**Description:**

Electroporation-Based Therapies for Cancer reviews electroporation-based clinical studies in hospitals for various cancer treatments, including melanomas, head and neck cancers, chest wall breast carcinomas, and colorectal cancers, as well as research studies in the lab using cell lines, primary cells, and animals.

Cancer kills about one American per minute, amounting to over 500,000 deaths in the United States and millions, worldwide, each year. There is a critical need for safe, effective, and affordable alternative treatment modalities, especially for inoperable, recurring, and chemo-resistant cancers, that do not respond well to current treatment regimen. An electrical-pulse-mediated, enhanced drug delivery technique known as electroporation is one way to effectively treat these patients.

This technique is especially suitable for low- and middle-income countries, where lack of infrastructure and resources leads to cancer diagnoses at late stages. This quick, safe, effective, economical, out-patient-based technique is a boon to these patients for palliative and other care with enhanced quality of life. This book features discussions by interdisciplinary authors-including practicing oncological surgeons, medical professionals, and academic and other researchers-of the basics and clinical medical applications of electroporation.

- Provides novel and recent clinical applications of electrochemotherapy for various cancers, including melanomas, sarcomas, superficial extreme melanoma, chest wall breast carcinoma, and colorectal cancers-

**Contents:**

- Dedication- Epigraph- List of figures and tables - Figures- Tables- Acknowledgments- About the editor- About the contributors- Introduction - Motivation:- Organization of the chapters- Audience- 1. Electrochemotherapy

A novel cancer treatment - Abstract:- 1.1 Why electrochemotherapy?- 1.2 References- 2. Clinical electrochemotherapy for chest wall recurrence from breast cancer - Abstract:- 2.1 Introduction- 2.2 Scope of the problem- 2.3 Treatment options for chest wall recurrence- 2.4 Clinical experience with electrochemotherapy- 2.5 Electrochemotherapy: the engineer's point of view- 2.6 Conclusions and perspectives- 2.7 Acknowledgments- 2.8 References- 3. Clinical electrochemotherapy for advanced superficial melanoma - Abstract:- 3.1 Introduction- 3.2 Therapeutic options in advanced melanoma- 3.3 Clinical experience with electrochemotherapy- 3.4 Conclusions and perspectives- 3.5 References- 4. Low and high voltage electrochemotherapy for breast cancer: an in vitro model study - Abstract:- 4.1 Introduction- 4.2 Anatomy of the breast and its cancer- 4.3 Drug delivery issues- 4.4 Chemotherapy issues- 4.5 Common adverse effects of anticancer drugs- 4.6 Anticancer drug resistance- 4.7 Electroporation and electrochemotherapy- 4.8 Materials and methods- 4.9 Results and discussion- 4.10 Conclusions- 4.11 Acknowledgments- 4.12 References- 5. Why electroporation is a useful technique for cancer treatments - Abstract:- 5.1 Introduction- 5.2 What is electroporation (EP)?- 5.3 Irreversible electroporation (IRE)- 5.4 Electrochemotherapy (ECT)- 5.5 Example of a hydrophilic agent used with electrochemotherapy- 5.6 Local delivery by intratumoral injection versus systemic administration in EP- 5.7 Prerequisites for effective ECT- 5.8 ECT can overcome multidrug resistance- 5.9 Intense nanosecond pulsed electric fields (nsPEFs)- 5.10 Electroporation therapies can produce a reduction in blood flow to tumors- 5.11 Properties of solid tumors- 5.12 Why do tumors have increased susceptibility to (EP) permeabilizing pulses, compared to that of normal tissue?- 5.13 Membrane composition and mineral concentrations of cancer cells affect the electrical properties- 5.14 Oxygen levels vary in solid tumors- 5.15 Glycolysis and pH- 5.16 Conclusions- 5.17 References- 6. Electrically-enhanced proliferation control of cancer-stem-cells-like adult human mesenchymal stem cells

a novel modality of treatment - Abstract:- 6.1 Introduction

stem cells- 6.2 Mesenchymal stem cells- 6.3 Cancer and cancer stem cells- 6.4 Electrochemotherapy- 6.5 In-vitro study of ECT on MSC- 6.6 Materials and methods- 6.7 Results and analyses- 6.8 Discussion and conclusions- 6.9 Future directions- 6.10 Acknowledgments- 6.11 References- 7. An in vitro study of

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by Wire Transfer: Bank details will be provided on the invoice which you will receive after you place your order with us.
