Asia-Pacific Air Quality Control Systems Market by Technology, by Application, and by Country - Trends and Forecasts to 2019

Description: Asia-Pacific Air Quality Control Systems Market by Technology (Flue Gas Desulphurization (FGD), Electrostatic Precipitators, Fabric Filters, Nitrogen Oxide Control Systems, Scrubbers and Mercury Control Systems), by Application (Power Generation, Cement Manufacturing, Iron & Steel, Chemicals, Others), by Country - Trends and Forecasts to 2019

This report estimates the 'Asia-Pacific Air Quality Control Systems Market' in terms of value. The Asia-Pacific air quality control systems market is segmented on the basis of the technology type used which includes flue gas desulphurization (FGD), electrostatic precipitators, fabric Filters, Nitrogen Oxides (NOX) control systems, and scrubbers & Mercury control systems. The market is further segmented on the basis of countries such as Australia & New Zealand, China, India, Indonesia, Japan, Malaysia, Philippines, South Korea, Thailand, and Vietnam.

Air quality control systems are required for a healthy indoor and outdoor environment. These systems make it possible for industries to comply with national pollution control standards for clean air, thereby improving productivity and lowering health related absences. The air quality control systems market is witnessing a huge demand across Asia-Pacific because of the stringent regulations for industrial emission. Especially in developed countries such as China, Australia, and New Zealand environmental standards have been introduced to regulate harmful industrial pollutants. Rapid industrialization in the emerging economies is another major factor influencing the demand for such environmental products. With the rising population, the demand for cement in the construction industry is growing at a fast rate that is also, leading to the increase in emissions of SOX and NOX into the atmosphere. Cement manufacturing has become one of the key application areas for air quality control systems. The coal-fired power plants and cement industries are experiencing high growth rates in countries like India, China, Vietnam, and Japan.
