Global Automotive Logistics Market 2014-2018

Description: About Automotive Logistics

Automotive logistics is used by different manufacturing vendors for the movement of vehicles or parts of vehicles from manufacturing plants to different customers. Automotive manufacturers maintain strong partnerships with 3PL, which provides them with efficient cost-effective metrics as required. The Automotive industry uses logistics for the complete management of the way resources are acquired, stored, and moved to other locations. The use of logistics helps the Automotive industry to have a continuous supply of goods and services from different prominent suppliers and distributors in different regions.

The analysts forecast the Global Automotive Logistics market to grow at a CAGR of 6.43 percent over the period 2013-2018.
