Neural Crest and Placodes, Vol 111. Current Topics in Developmental Biology

Description: Neural Crest and Placodes provides in-depth coverage of the topic, including information on their critical role in vertebrate development, evolution, and the way defects in their development underlie a wide range of congenital disorders. It delves deep into advances made in our understanding of the mechanisms governing the formation, migration, and differentiation of these two cell populations, also discussing their integration during embryonic development.

The text highlights the application of fundamental knowledge in investigating the etiology and pathogenesis of congenital disorders and the ways the data applies to the field of regenerative medicine.

- Written by leading experts in the field
- Includes descriptions of the most recent advances in the field
- Highlights the applications of this knowledge in investigating the etiology and pathogenesis of congenital disorders
- Explores their usage in the field of regenerative medicine
