The report also entails a detailed description on the recent trends and developments in the market, major challenges and opportunities, and competitive scenario of major players in the wound care industry.

The wound care products are an important part of the overall healthcare industry in India. The growth in India wound care market has been largely impelled by the augmenting demand for better quality of healthcare services and increasing number of lifestyle diseases. Increasing demand for wound care products, as contributed by the factors such as high population growth, rising incomes and a growing middle class is anticipated to further stimulate the country’s overall wound care products in the following years.

A higher demand of wound care products especially an increased trend in the usage of advanced wound care products has been observed amongst people of India. The increase in the advanced wound care market has been observed due to the penetration of foreign players in the India wound care market and increased disposable income of the population of India. There have been no significant changes in the traditional wound care market changes in the review period.
