Stem Cell Research Products - Opportunities, Tools, & Technologies

Description: This global strategic report evaluates strategies across the entire stem cell product spectrum, with emphasis on opportunities for stem cell research product development. It explores unique market opportunities by stem cell type, including mesenchymal stem cells (MSCs), hematopoietic stem cells (HSCs), induced pluripotent stem cells (iPSCs), embryonic stem cells (ESCs), neural stem cells (NSCs), and more.

The possibilities arising from stem cells have resulted in great commercial interest, with potential applications ranging from their use in the reversal of disease, to targeted cell therapy, tissue regeneration, pharmacological testing on cell-specific tissues, toxicology assessment, and more.

Several broad categories of stem cells exist, including:
- Embryonic stem cells, derived from blastocysts
- Perinatal stem cells, obtained during the period immediately before and after birth
- Adult stem cells, found in adult tissues
- Induced pluripotent stem cells, produced by genetically reprogramming adults cells
- Cancer stem cells, which give rise to clonal populations of cells that form tumors or disperse in the body

Traditionally, scientists have worked with both embryonic and adult stem cells as research tools. While the appeal of embryonic cells has been their ability to differentiate into any type of cell, there has been significant ethical, moral and spiritual controversy surrounding their use. Although some adult stem cells do have differentiation capacity, it is often limited, which results in fewer options for use.

Thus, when induced pluripotent stem cells (iPSCs) were produced from mouse cells in 2006 by Shinya Yamanaka of Kyoto University in Japan, they represented a promising combination of adult and embryonic stem cell characteristics. By 2007, a series of follow-up experiments were done at Kyoto University in which human adult cells were transformed into iPSC cells. Nearly simultaneously, a research group led by James Thomson at the University of Wisconsin-Madison accomplished the same feat of deriving iPSC lines from human somatic cells.

At this time, the following account for the majority of stem cell research:
- Basic Research - Understanding stem cell mechanisms and behavior
- Regenerative Medicine - Use of stem cells for the reversal of injury or disease
- Drug Target Validation and Drug Delivery - Validation of the predicted target using living cells
- Toxicology Screening - Use of stem cells to evaluate effects of drugs on biological systems

Contents:
I. Abstract
II. Purpose
   A. Survey Recent Stem Cell Research Product Advancements
   B. Provide a “Snapshot” of the Global Stem Cell Research Products Market
   C. Assess Opportunities for Commercialization
   D. Identify Major Market Players and Assess the Competitive Environment
   E. Identify Existing and Emerging Trends
   F. Identify Critical Opportunities and Threats within the Marketplace
III. Research Methodology
   A. Input Sources
   B. Research & Analysis Methodologies
   C. Criteria for Identifying Market Leaders
      1. Size of Company
      2. Type of Product/Services
      3. Degree of Specialization
      4. Patent Positions
5. Business Reputation
6. Financial Strength
7. Partnerships
8. Certifications

IV. Key Events In The Development Of Stem Cell Research Products

V. Types Of Stem Cells
A. Human Embryonic Stem Cells (hESC)
   1. Early, 5-7 days (Totipotent)
   2. Gonadal Ridge, 6 months (Pluripotent)
B. Fetal Stem Cells (Pluripotent)
C. Umbilical Cord Stem Cells (Multipotent)
   1. Cord Blood
   2. Cord Matrix (“Wharton's Jelly”)
D. Adult Stem Cells (Multipotent)
   1. Hematopoietic Stem Cells
   2. Mesenchymal Stem Cells
   3. Neural Stem Cells
   4. Dental Stem Cells
   5. Adipose-Derived Stem Cells
E. Cancer Stem Cells (Multipotent)
F. Induced Pluripotent Stem Cells (iPSCs)

VI. Stem Cell Research Applications
A. Basic Research
B. Regenerative Medicine (Cell-Based Therapies)
   1. Diabetes Mellitus
   2. Cardiovascular Disease
   3. Neurological Disease
   4. Autoimmune Disease
   5. Hematopoietic Transplantation Research
   6. Orthopedic Repair
   7. Cancer Research
   8. Birth Defect Research
C. Drug Discovery & Development
   1. Assays to Aid Early Stage Discovery
   2. Improved Prediction of Human Responses
   3. Drug Development with Humanized Mouse Models
   4. Genetically-Engineered Stem Cell Lines for Screening
   5. Pluripotent Stem Cell Lines for Target Validation and Drug Screening
   6. Summary - Use of Stem Cells within Drug Discovery & Development

VII. Key Competitors In The Stem Cell Research Products Marketplace
A. Thermo Fisher Scientific (Includes Life Technologies, Invitrogen, and Other Major Brands)
   1. Acquisitions
   2. Collaborations
      a. Invitrogen and Cellartis AB
      b. Invitrogen and Novocell
      c. Invitrogen and the Buck Institute
      d. Life Technologies and Cellular Dynamics International (CDI)
      e. Life Technologies and iPS Academia Japan
      f. Life Technologies and Harvard University
      g. Life Technologies and DNAVEC Corporation
      h. ToolGen, Inc. and Thermo Fisher Scientific Sign License Agreement for CRISPR/Cas9 Genome Editing Technology
      i. SYGNIS grants non-exclusive license on Double Switch Technology to Thermo Fisher Scientific
B. BD Biosciences (Division of Becton, Dickinson and Company)
   1. Acquisitions
   2. Collaborations
      a. BD Biosciences and STEMCELL Technologies Sign License Agreements with WARF
      b. Other Licensing Deals
      C. Merck KGaA
1. Acquisitions
   a. Acquisition of Sigma Aldrich for $17 Billion
   b. Other Acquisitions
2. Collaborations
   D. Miltenyi Biotec
      1. Acquisitions
      2. Collaborations
   E. STEMCELL Technologies
      1. Acquisitions
      2. Collaborations

VIII. Stem Cell Product Areas
A. Stem Cell Product Categories, by Type
   1. Primary Antibodies
   2. Bead-based Cell Separations Systems
   3. Fluorescent-based Labeling and Detection
   4. Protein Purification and Analysis Tools
      a. Protein Purification
      b. Stem Cell Protein Analysis
      c. Quantitative Proteomics
   5. DNA/RNA Based Characterization
      a. Tools for DNA- and RNA-based Characterization
      b. Stem Cell HLA Typing
      c. Stem Cell Nucleic Acid Extraction and Purification, and Associated PCR/qRT-PCR Reagents
   6. Isolation / Characterization Services
      a. Stem Cell HLA Typing Services
      b. Stem Cell Custom Services
      c. Stem Cell Custom Antibodies
   7. Stem Cell Culture Media and Reagents
   8. Growth Factors and Cytokines
   9. Stem Cell Gene Regulation
10. In vivo / In vitro Stem Cell Tracking
11. Expansion & Differentiation Services
    a. Stem Cell Media Services
    b. RNAi Services
12. Stem Cell Lines

IX. Emerging Areas Of Stem Cell Research
A. Induced Pluripotent Stem Cells (iPSCs)
B. Cord Blood Stem Cells
C. Dental Pulp Stem Cells
D. Adipose-Derived Stem Cell Storage

X. Market Size
A. Definitions
B. Methodology
   1. Roll-up all competitor sales ("Gold Standard")
   2. Use a weighted analysis of industry leaders ("Silver Standard")
   3. Survey customers for how much they spend in the market ("Bronze Standard")
C. Market Size Estimations
D. Five-Year Market Size Projections (2016-2020)

XI. Market Trend Analysis
A. Clinical Trial Analysis
   1. Clinical Trial Analysis, by Year
   2. Clinical Trial Data, by Region
   3. Clinical Trial Analysis, by Stem Cell Type
B. Grant Analysis
C. Patent Analysis
   1. Stem Cell Patents, by Year
   2. Stem Cell Patents, by Type
D. Scientific Publication Rate Analysis
   1. Historical Data
2. Future 5-Year Projections
3. Comparison of Stem Cell Research Frequency, by Cell Type
4. Percentage of Stem Cell Research, by Cell Type (Trailing 12-Months)
E. Funding of Stem Cell Initiatives
1. National Institute of Health (NIH) Funding of Stem Cells
2. State Stem Cell Funding
3. Private Stem Cell Funding

XII. Scientist Panel: Detailed End-User Survey
A. Survey Overview
B. Characterization of Market Survey Respondents
1. Geographic Distribution of Respondents
2. Respondent Breakdown by Industry Affiliation
3. Breakdown of Respondents by Duration of Stem Cell Research Activity
   C. Survey Findings - General Scope
   D. Survey Findings - Applied Stem Cell Research
   E. Survey Findings - Comparison of Providers (Brand Preferences)
   F. Survey Conclusions and Analysis

XIII. Strategies For Accessing The Marketplace
A. Top Research Institutions Performing Stem Cell Research
1. University of Wisconsin, including WARF, WiCell, and the WISC Bank
2. U.S. National Institutes of Health (NIH)
3. California Institute for Regenerative Medicine
4. RIKEN Center
5. Kyoto University
B. Top Countries for Stem Cell Research
C. Events of Interest

XIV. Social Analytics For Stem Cells
A. Marketing Cost Analysis for Stem Cells - Pay-Per-Click (PPC) Analysis
B. Stem Cell Articles Receiving Most Social Media Shares over Past 12 Months
C. Google Trend Data for Stem Cells
1. Google Trend Data - Mesenchymal Stem Cells
2. Google Trend Data - All Types of Stem Cells
D. Twitter Hashtag Data
E. Top Five Stem Cell Influencers on Twitter

XV. Conclusions

APPENDICES
APPENDIX A. Top 10 Influencers for Stem Cells

Ordering:

Order Online - http://www.researchandmarkets.com/reports/3611450/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit

http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.

Product Name: Stem Cell Research Products - Opportunities, Tools, & Technologies
Web Address: http://www.researchandmarkets.com/reports/3611450/
Office Code: SC

Product Formats
Please select the product formats and quantity you require:

<table>
<thead>
<tr>
<th>Product Format</th>
<th>Quantity</th>

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:

Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by Wire Transfer: Bank details will be provided on the invoice which you will receive after you place your order with us.

If you have a Marketing Code please enter it below:

Marketing Code: ____________________________

Please note that by ordering from Research and Markets you are agreeing to our Terms and Conditions at http://www.researchandmarkets.com/info/terms.asp

Please fax this form to:
(646) 607-1907 or (646) 964-6609 - From USA
